## locks..

A wide range of mortise locks and latches or dead bolt locks , are available to accommodate all types of timber , steel and aluminium doors .

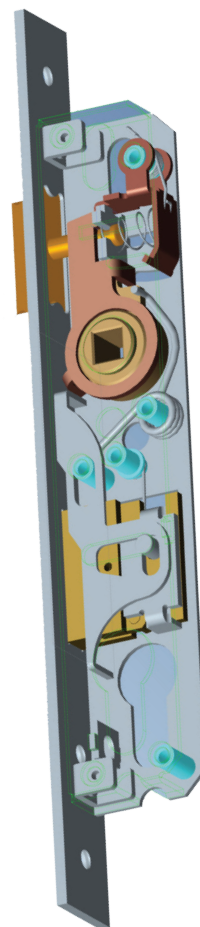

manufactured with high grade quality functions and high grade materials according to standards of DIN 18250 DIN 18251 in class 3 and class 4

### Mortise locks for projects and functional doors

For project doors , fire security doors , smoke / fire protection doors , and wet room doors

RAL certified controlled production

Anti - thrust deadbolt series equipped with whisper comfort as a standard

### Mortise locks for interior doors

- For all kind of interior doors , including swinging doors , follower bearing as a standard

- Whisper - Comfort noise Reduction

Certified application in smoke protection doors

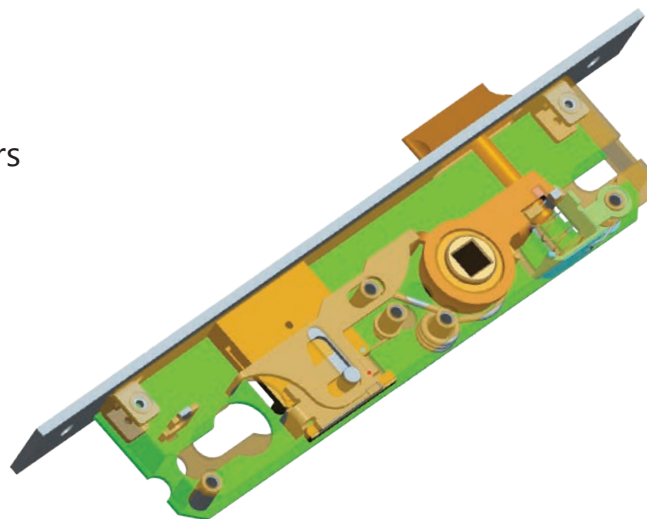

### Mortise locks for aluminium and PVC frame doors

- For exterior interior doors

- Compact EURO - dimensions

- Follower bearing as a standard

- Certified application in smoke protection doors

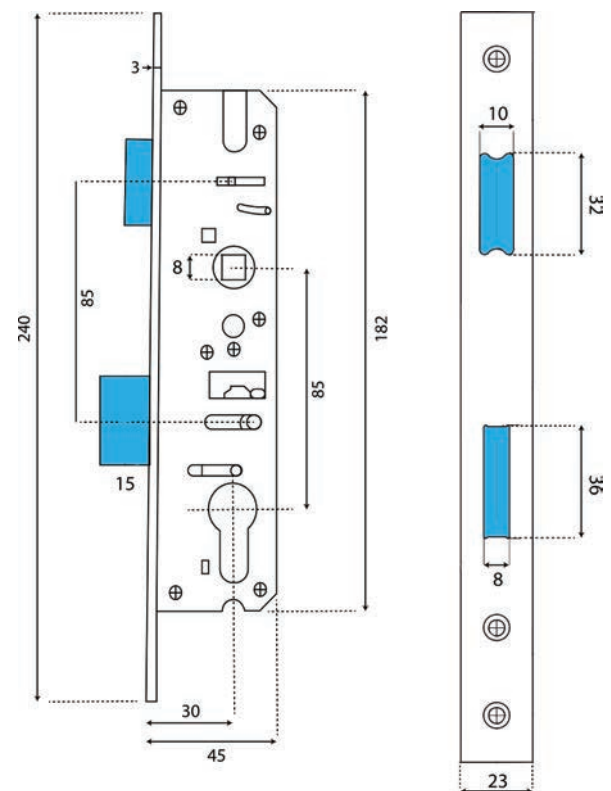

## ADLER mortise lock : AD-18530

### Manual - locking system

With its innovative modular design, locks allows for many applications on narrow stile (aluminium and PVC) door systems. Due to their reversible latch-bolt, the locks are non-handed (DIN L.H / DIN R.H usable). Moreover, the burglary-inhibiting locks are suitable for use on fire protection and escape doors.

### Features and benefits provided by ADLER lock :

- Non-handed lock with DIN L.H/R.H reversible latch
- 15mm deadbolt single throw (manual activation)
- G.I Lock case thickness of only 15.5 mm
- Follower pucket cast stainless steel
- Latch & deadbolt made of brass nickel-plated
- Squared forend: made from solid stainless steel 304g satin finish

### Technical data :

Centers	85mm (euro-profile cylinder)
Backset	30mm
Follower	8mm
Deadbolt throw	single throw 15mm (manual activation)
Latch-bolt	10mmx32mm reversible latch
Squared forend	240mmx23mmx3mm stainless steel

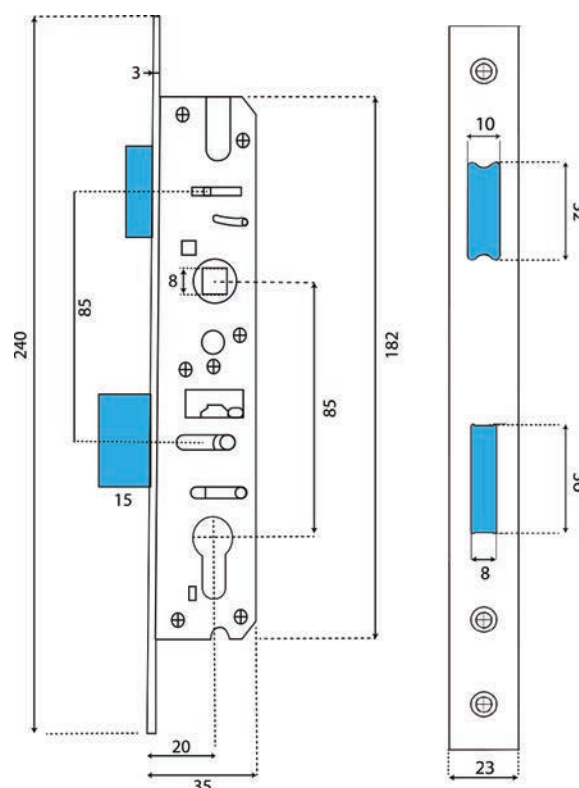

## ADLER mortise lock : AD-18520

### Manual - locking system

With its innovative modular design, locks allows for many applications on narrow stile (aluminium and PVC) door systems, Due to their reversible latch-bolt, the locks are non-handed (DIN L.H / DIN R.H usable). Moreover, the burglary-inhibiting locks are suitable for use on fire protection and escape doors.

### Features and benefits provided by ADLER lock :

back set 70mm

## ADLER door cylinder

The door cylinder is the heart of any door and has top priority when it comes to protection against break-ins. Despite their importance, many locking cylinders based on outdated technology are still being fitted – with no protection against tampering, with no emergency or hazard functions, etc. Today's door cylinders are high-quality, high-tech products with versatile and effective features, must ensure reliable locking for years to come with precise interaction between the body, pins, balls and springs.

## ADLER door cylinders – Security tried and tested a thousands times over

Adler door cylinders have been put through their paces a thousands times over and are manufactured to meet DIN 18252 and EN 1303. The range covers everything from the basic cylinder. We have an extensive range of lengths and models that can be used in combination with additional door locks, reinforced bolts and padlocks.

## Conventional locking technology

Regardless of whether in the private or industrial sector – with conventional locking systems from Adler as standard solution you are always on the safe side. With versatile and reliably functioning locking cylinders spanning the total range of applications – from single-key or keyed-alike applications. All systems feature lock bumping protection as standard and can be fitted with certified drill and pick protection elements as an option. According to requirements, the systems come with 5-pin or 6-pin cylinder variants.

## ADLER cylinder series : AD-DKC

### Double cylinder

Adler offer a range of cylinder systems to suit most applications and projects. A number of considerations should be taken into account in order to select the most suitable cylinder system for your application

### Application

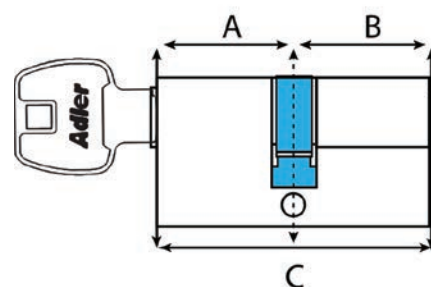

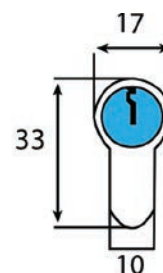

- Double side key cylinder
- For use with euro profile lock cases

### Specification

- Extensive differs, available in 5 or 6 pin
- Pins-hardened steel derives cylindrical mushroom type anti picking function
- May be supplied to differ, keyed alike or keyed to pass
- May be supplied master keyed
- Construction keying, clutch release and classroom functionality available
- Can be keyed with other cylinder products such as padlock, outside locking devices and cabinet locks, which use the same key section
- For master key information check with your adler area manager
- Supplied with 3 brass nickel plated keys as standard
- Restricted keyway duplications on authorization

### Material & Finish
